

## The **Vari-MaTriX HD** (High Density)

**Vari-MaTriX  
HD**

*Competition*

**Cat. 6  
0.230"**

### **Category 6 Size, Category 6A Performance**

- Increases cable fill up to 35%
- Upgrade using existing pathways
- Easier to install
- Same Panduit Category 6A performance

### The **Future** without Fuss

The Vari-MaTriX HD's combination of small size and superior performance make it the ideal choice for applications of today and tomorrow.

**Wifi  
Applications**

**PoE++  
Devices**

**Digital  
Buildings**

**5G  
DAS**

Upgrading from Category 6 to 6A can be difficult due to differences in size as larger cable is harder to work with and requires more space in pathways. Equivalent in performance, yet smaller in size to the previous Vari-MaTriX cable, the Vari-MaTriX HD will have headroom and provide best-in-class alien crosstalk protection. These features assure customers ease of installation while also delivering strong and robust network connection.
